

# EZ EV Charging

- First UL-Approved EV Charge Station
- 17"W x 14"H x 6"D (430mm W x 360mm H x 150mm D)
- Over 100,000 installations nationwide
- Service Entrance: 208V to 240V—30 to 100 Amps, single phase, 2 wire w/ground
- Outdoor rated (NEMA 4) enclosure
- Operating Temperatures: -22F to 122F (-30 C to 50 C)

Liberty Plug-In provides a unique system that can be used as a simple access control or as a billing system for reimbursement of charging costs. For public access management, access codes can be received via text message, phone call, online, or by smartphone app. Networking and billing systems are external of the EV charger itself; making it less expensive, more reliable, and easier to install.
